Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election of claims 1-3, 7, 9-14, and 32 of September 5, 2007 is acknowledged. The restriction of claim 8 is withdrawn and claim 8 has also been examined. Claims 13 and 14 have not been examined because they are dependent on non-elected claim 5.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 7-10, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Hare.

O'Hare shows a shower head comprising a housing, a disk 120 having numerous apertures 122, a water inlet, and an aerator (including plates 26, 30, and air chamber 34). The shower head also comprises a structure 118 for forming the water jets and wherein the aerator is configured to aerate water upstream from the structure 118 as recited in claims 2 and 3. The aerator has a hub 12 having at least one radial air conduit at an end that faces an interior of the housing as recited in claim 10.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3752

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over O'Hare.

O'Hare also discloses the aeration hub having axially arrayed guides 30 for guiding the aerated jets. O'Hare does not disclose the guides being on the exterior of the hub, however, such a modification would have involved a mere change in the placement of an object which is generally recognized as being within the level of ordinary skill in the art when the same function will still be carried out.

6. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over O'Hare in view of Aghnides.

Aghnides teaches a shower head comprising inclined jet passages 43. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of O'Hare by making the jet guides to be inclined as has already been taught by Aghnides.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
